REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The Janssen art used in the double patenting rejection has the same inventive entity as the instant application and a terminal disclaimer has been filed in this application to overcome the double patenting rejection. The closest prior art Wang in view of Katz and Matsuura in view of Katz fail to teach that the surface of the beads have a surface with at least a vinyl functional group covalently bonded to the elastomeric polymer matrix or donning layer. Wang and Katz fail to teach a vinyl functional group and Matsuura and Katz teach that the particle itself is made from acrylate, but there is no teach to suggest that the beads should be covalently bonded to the polymeric matrix or donning layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Terminal Disclaimer

2. The terminal disclaimer filed on July 13, 2006 disclaiming the terminal portion of any patent granted on this application

which would extend beyond the expiration date of US Patent 6,972,148 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Drawings

3. The Drawings received on November 19, 2003 are acceptable.
